# C2

COMPONENTS | 10 implemented REST controllers and their service / persistence paths; one API :8080

WEB / NGINX :80 | host :5173

API ROUTING / JWT / AUTHORIZATION / RATE LIMITING / OPENAPI :8080

AUTH / AuthController

AuthenticationService

User + Token repositories

LongevityDietDb

PROFILE / ProfileController

ProfileService

UserProfile repository

LongevityDietDb

REMINDERS / ReminderNotificationsController

ReminderService + IdentityRedisBridge

Identity outbox / inbox

LongevityDietDb + Redis

ACTIVITY / TrackingController

TrackingService

TrackingDbContext

LongevityTrackingDb

ACTIVITY ADVICE / RecommendationController

ActivityCoach gRPC client

gRPC adapter (stateless)

Recommendation gRPC

API ROUTING CONTINUED (SAME .NET API CONTAINER)

MEAL PLANS / MealPlansController

MealPlanningService

MealPlanRepository

LongevityDietDb

MEAL LOGS / MealLogsController

MealTrackingService

MealLogRepository

LongevityDietDb

EATING WINDOW / EatingWindowController

MealTrackingService

EatingWindowRepository

LongevityDietDb

RECOMMENDATIONS / RecommendationsController

RecommendationService + gRPC client

RecommendationRepository

LongevityDietDb + gRPC

FMD / FmdController

FmdService

FmdRepository

LongevityDietDb

SHARED DEPENDENCIES (not extra API instances): ActivityCoach / Recommendation gRPC :8081 (stateless); Redis Streams :6379 <-> Reminder Worker; SQL: LongevityDietDb, LongevityTrackingDb, LongevityWorkerDb. Future clinical nutrition/check-in target is NOT deployed.
