Database Diagram | FULL CURRENT ERD

One connected relationship tree | 32 real EF Core tables | 3 SQL databases | 9 enforced foreign keys

SQL FK / Crow's Foot / 1:1 or 1:N / 9

Shared key or business association / NOT FK / 16

Event / Outbox / Inbox lineage / NOT FK / 6

HOW TO READ: Follow relationships from Users into profile, meal planning, meal logs, FMD, activity and reminder events. PK = primary key, FK = SQL-enforced foreign key, APP REF = key present in the app but not SQL-enforced.
ACCURACY: All 32 mapped tables are shown with selected key fields; full column definitions are in the EF Core models. No decorative domain dividers, inverted SQL links or pseudo-hubs.
