C2 | API COMPONENTS

Scope: one REST API :8080 / endpoint → controller → service → persistence → DB reference

WEB / NGINX
HTTP :80
/api HTTP :8080
API ROUTING
JWT / Role
Rate limiting
REST :8080
HTTP route
AUTH
AuthController
Calls
AuthenticationService
Uses
UserRepository + RefreshTokenRepository
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
PROFILE
ProfileController
Calls
ProfileService
Uses
UserRepository / Profile persistence
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
REMINDERS
ReminderNotificationsController
Calls
ReminderService / IdentityRedisBridge
Uses
Identity outbox + inbox persistence
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
MEAL PLAN
MealPlansController
Calls
MealPlanningService
Uses
MealPlanRepository
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
MEAL LOG
MealLogsController
Calls
MealTrackingService
Uses
MealLogRepository
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
EATING WINDOW
EatingWindowController
Calls
MealTrackingService
Uses
EatingWindowRepository
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
MEAL ADVICE
RecommendationsController
Calls
RecommendationService + gRPC client
Uses
RecommendationRepository / gRPC adapter
SQL :1433 + gRPC :8081
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
Also gRPC engine HTTP/2 :8081
HTTP route
FMD
FmdController
Calls
FmdService
Uses
FmdRepository
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityDietDb SQL :1433
HTTP route
ACTIVITY
TrackingController
Calls
TrackingService
Uses
TrackingDbContext
SQL TCP :1433
DATABASE REFERENCE / SHARED
LongevityTrackingDb SQL :1433
HTTP route
ACTIVITY ADVICE
RecommendationController
Calls
TrackingService + ActivityCoachClient
Uses
TrackingDbContext + gRPC adapter
SQL :1433 + gRPC :8081
DATABASE REFERENCE / SHARED
LongevityTrackingDb SQL :1433
Also ActivityCoach gRPC :8081

DATABASE REFERENCES: Repeated labels point to the SAME actual catalogs, NOT ten separate DB deployments.
LongevityDietDb (21 tables) + LongevityTrackingDb (7) are accessed by this API; the separate Worker owns LongevityWorkerDb (4). gRPC :8081 performs stateless computation (no separate DB). API ↔ Redis :6379 ↔ Worker ↔ Worker DB appear in C1.
