C2 COMPONENT ARCHITECTURE | DOMAIN PIPELINES

Mỗi miền kết nối REST endpoint → application service → persistence/outbox trong database riêng.

ROUTES: identity / catalog / planning / tracking / recommendation / worker-ops

IDENTITY

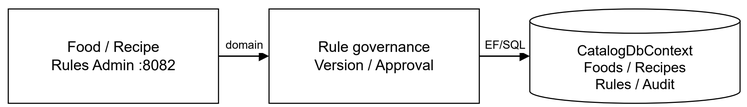

OWNED ROUTES: /auth/** /profile

No cross-owner SQL / target service isolated

CATALOG

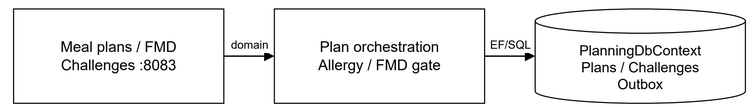

OWNED ROUTES: /foods /recipes /diet-rules

No cross-owner SQL / target service isolated

PLANNING

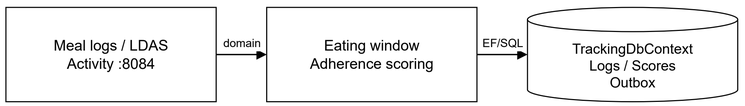

OWNED ROUTES: /meal-plans /challenges

No cross-owner SQL / target service isolated

TRACKING

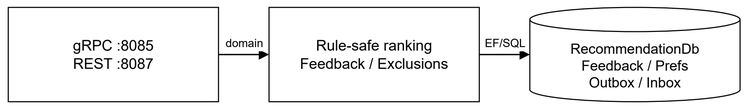

OWNED ROUTES: /meal-logs /activities /ldas

No cross-owner SQL / target service isolated

RECOMMENDATION

OWNED ROUTES: /recommendations/**

No cross-owner SQL / target service isolated

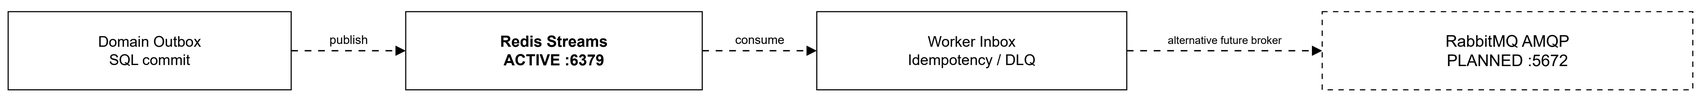

WORKER / OPS

OWNED ROUTES: /admin/jobs /events /dead-letter

No cross-owner SQL / target service isolated

EVENT DELIVERY / OWNERSHIP

Target architecture (ADR-005); legacy REST API still serves some routes. RabbitMQ is shown for future messaging only, not as an already connected production component.
